Air Castle Paintings, 2016 - Ongoing
Digital paintings, dimensions variable

The Air Castle Paintings is an ongoing digital painting series. Using software, the imagery is made by experimentation and play using 3d digital objects as visual elements.

Air Castle, 2016
Software, dimensions variable, perpetual duration
<http://matthewkeff.com/aircastle>

Air Castle is an endless animated visual set in an absurd and surreal context. The work was built using game development software which runs live and perpetually. Many different items are added to the scene at random and strung about in open space with simulated physics. By presenting the items in this way, the piece explores a relationship between people and meaningful objects.

Land of Milk and Honey 2016
Software, video projection, flatscreen monitor
Hollows Art Space, Brooklyn

Land of Milk and Honey playfully examines digital material culture and the relationship between people and the things they wear on their bodies. The items in the scene are whimsically strewn about using a physics engine, so that they fly, float, fall, and burst autonomously.

Orange Grove Empathy Trees 2016
Software, web browser
<http://matthewkeff.com/orangegroveempathytrees>

Orange Grove Empathy Trees is a web based generative image series. The work envisions the world as an endless orange grove where aside from citrus, many emotional and ironic objects bloom from the trees.

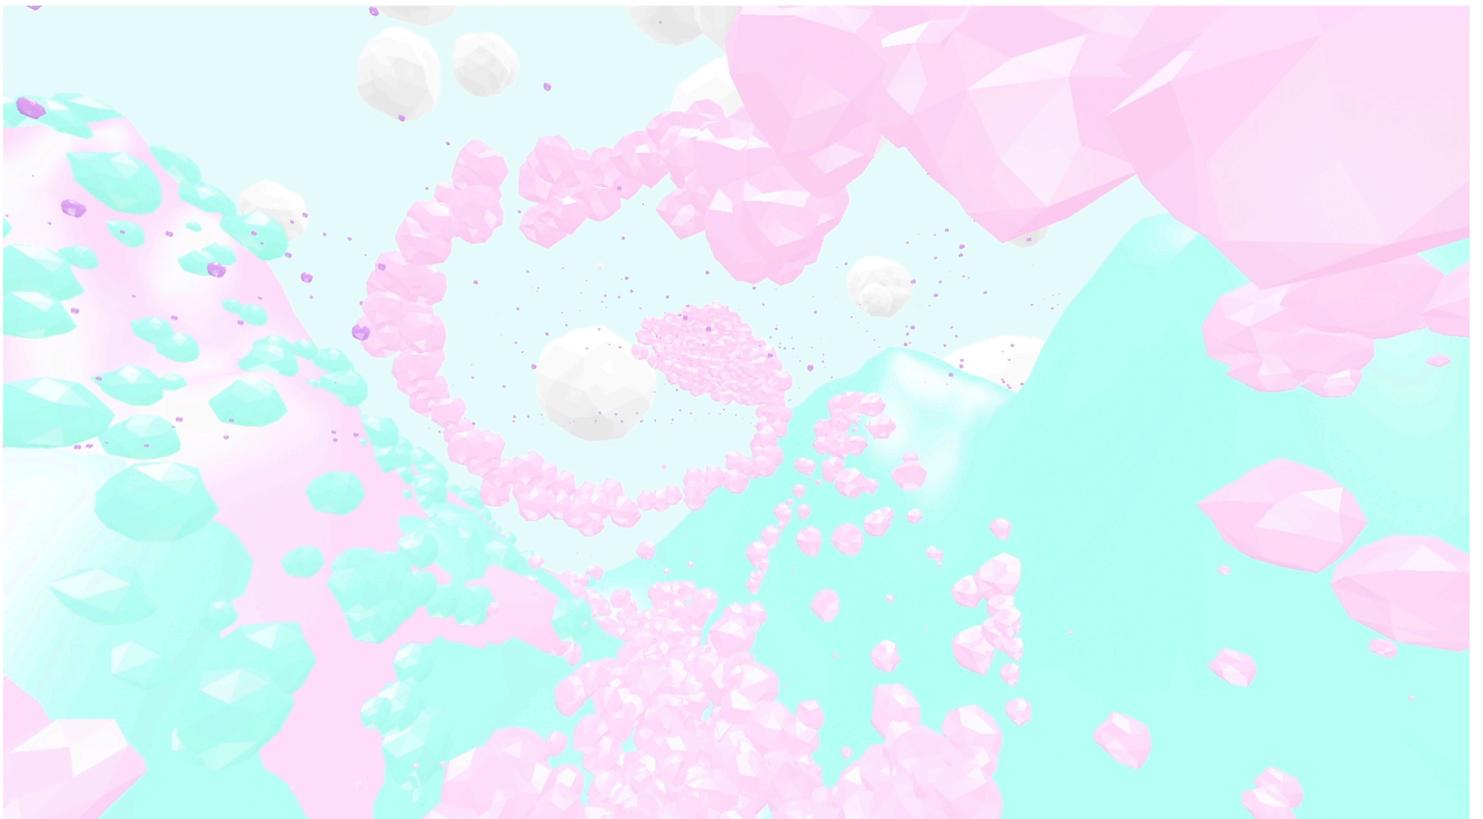

Gunshow FPS 2016

Software, game controller, flatscreen monitor

<https://vimeo.com/168255181>

GunShow FPS is an expressive game simulation from the “first person” perspective. It juxtaposes the subject of gun violence against playful absurdity.

Tama, 2015
Single-channel HD video, sound, 3mins
<http://matthewkeff.com/tama.html>

Tama is an experimental narrative music video. The animations are the outcome of several artificial life simulations running simultaneously.

Dream Dreamer, 2015

Software, game controller, sound, infinite duration

<https://daydreamdreamdreamer.itch.io/dream-dreamer>

Dream Dreamer is a day dreaming simulator set on an imaginary plane of existence. Pleasantly buoyant bubbles are released every few seconds accompanied by classical harp.

Realistic Nature, 2015

Software, game controller, sound, infinite duration

<https://daydreamdreamdreamer.itch.io/realisticnature>

Realistic Nature is a walking simulator staged in a fantastic micro-forest.

Fountains, Falls & Floats, 2012 - 2016
8 x Single-channel HD video, website, infinite duration
<http://matthewkeff.com/fountainsfalls&floats>

Fountains, Falls & Floats is a series of full screen infinitely looping video websites mimicking movement found in nature.
