

Number I-IIIIIIIIIIIIIIIIII- After this apostrophe, conclusion from another perspective :

It is now the dawn, As I drive along, 30, 40, 50, speech was made an event,
(looking at the watch)
Here, As I was once born in, and , will always carry,
something of a fictional I had, indeed looked at the time for,
Instance.
Quite some time already, urging for something to occur,
To happen, though, structure seemed to gave it all, once its limitation,
Accepted. But not only breath may have participated, in the realization of,
Of an even too, short occurrence. Yet we didn't get it all, and to answer futur,
Scepticism, there was there is as much necessity for it to exist as such,
Than there is non. Contingency isn't here, what is, called upon but,

Rather choice, bound to the contingent. The writing part now,
Is of a frightening dubious for most part character,
I, and here is the absolute, fact, never intended
To do so. Absolute fact, says I, for I will have then
The irreducible possibility pause to state, If it hasn't already in the
Past, to say, says I That I'm not the author of
What came to fill, the gaps, rather should I claim
Authority for those latter as I aspire
Them (gaps being socially mistaken for silence silence for,
Embarrassment for music avant-garde couldn't solve this),

Be more important, in a near futur, here is then, how I see,
The structure you attended, and its compartementalized organization,
Giving more credits to the between part as opposed to,
The relative importance of the part, themselves. This lecture,
To some extent only of course is of a formalist gesture,
in the most powerful sense of The term, shall we
understand and conclude an excess of rationality as
a potential failure.

Thank you for your attention.
